

KICKR RUN

smart treadmill

RUN REAL

RunFree Mode: KICKR RUN allows you to run hands-free, even as you change your pace. Using advanced position sensing technology to automatically adjust the belt speed to your stride, you are fully immersed while running indoors.

Elite Speed: With a max speed of 4:00/mile, KICKR RUN gives runners the ability to train at paces required to achieve personal bests.

Responsive Surface + Lateral Tilt: Outdoor running surfaces like asphalt, tracks and trails, provide a natural energy return that propels you forward and helps to create a more efficient stride. KICKR RUN emulates this ground-feel, challenging certain muscle groups to respond actively when you're running indoors. With side-to-side tilting capability, KICKR RUN offers a more dynamic running experience, allowing runners to vary the pitch of the surface on the fly, keeping important foot stabilizer muscles prepared for varying outdoor terrain.

RUN SIMPLY

KICKR RUN minimizes the need to interact with the treadmill during your workout, freeing you to focus on your pace, your form and the natural joy of running.

Intuitive Speed & Grade Control: When runners want to take control, KICKR RUN makes it as simple as the nudge of accessible control paddles that can be adjusted without breaking your stride. The KICKR RUN will simulate the grade changes on Zwift for an engaging indoor run that keeps you going mile by mile.

Endless Deck: With a safe, open-ended belt design, KICKR RUN provides a sense of freedom, allowing you to stride naturally, without having to worry about the end of the treadmill.

RUN CONNECTED

KICKR RUN is a smart treadmill designed to seamlessly connect to training experiences and devices that will help you get the most from your indoor workouts.

Wahoo app
Download and use our Wahoo Fitness App to set up your KICKR RUN. Connect your devices to the WiFi, pair sensors, and record workouts all on your smart device.

Your Workout. Your Screen: KICKR RUN is designed to use your phone, tablet, laptop or TV as your heads-up display and a way to control your training experience. Immerse yourself in the realism of virtual runs or stay focused on the intervals ahead during structured workouts. The choice is yours.
